Aman Nikumb

Software Engineer- Data@engineo solutions | Python Developer |
FastAPI | Data Extraction | ETL | Data Engineering
Gurugram, Haryana, India

Summary

A passionate Software Engineer with experience in Python, Django, Fast API, Application Development, MQ, Celery, Redis, DevOps(Docker, Docker-Compose), System Design, API Integration, VS Code, and Postman and also having knowledge of HTML5, CSS, Javascript. I enjoy building efficient and scalable solutions, automating tasks, and working with data. Always eager to learn new technologies and improve my skills to contribute effectively to innovative projects.

Open to collaboration, discussions, and opportunities to grow in the ever-evolving tech world!

Experience

engineo solutions

2 years

Software Engineer

April 2026 - Present (7 months)

Gurugram

Associate Software Engineer - Data

December 2024 - March 2026 (1 year 4 months)

Gurugram

- Developed a robust microservice backend system utilizing Django and FastAPI to handle high volume of client requests and support automated web crawlers.
- Integrated an event-driven Webhook system for real-time alerts and job updates, enhancing client responsiveness.
- Leveraged Redis, Celery, and RabbitMQ for efficient task management and processing of multiple client requests.

Associate Technical Consultant

November 2024 - December 2024 (2 months)

Gurugram, Haryana, India

- Installed Frappe ERPNext on Ace Cloud Server, enhancing operational efficiency.
- Set up Nginx public web server for effective routing, improving system accessibility.
- Configured HRMS interface tailored to company requirements, streamlining HR processes.
