Gurugram, India

Profile Summary

Python Backend Developer with 1.5+ years of experience designing scalable APIs, distributed systems, and automation pipelines. Strong expertise in FastAPI, Django, Celery, Redis, RabbitMQ, PostgreSQL, Docker and AWS (S3, OpenSearch). Proven track record of building high-performance backend systems, optimizing data workflows, and reducing manual effort through automation. Skilled in microservices architecture, asynchronous processing, and system performance optimization.

Work Experience

Engineo Solutions Pvt Ltd.

Associate Software Engineer- Data | Nov 2024 - Present

- Developed a distributed data extraction platform for a US-based travel domain client using Django, FastAPI, Celery, RabbitMQ, Redis, MongoDB, and PostgreSQL to support scalable data aggregation and monitoring
- Developed comprehensive API security layer by integrating API-Key, IP Whitelist, JWT, CORS and flagging bad user-agent
- Implemented Redis-based caching and rate-limiting, reducing redundant API calls by 40%+ and improving application responsiveness.
- Designed distributed task processing pipelines using Celery + RabbitMQ to automate background operations
- Engineered an automated data ingestion pipeline for a one among Big4 consulting firm, transforming Excel datasets into JSON payloads and inserting data into PostgreSQL through APIs, reducing manual effort by ~70%.
- Built dynamic parent-child relational mapping logic and resolving foreign key dependencies for seamless multi-table ingestion.
- Integrated AWS S3 for storage and AWS OpenSearch for indexing and fast retrieval, improving search performance and scalability.
- Currently contributing to ETL pipeline development using Databricks, gaining exposure to distributed data processing and transformation workflows.

Technical Skills

- Languages:** Python, SQL, Golang
- Libraries/Framework:** Django, DRF, FastAPI, Celery, Requests, BeautifulSoup, Pandas, Pydantic, SQLAlchemy, Pytest, Playwright, SeleniumBase
- Database:** MongoDB, PostgreSQL, Redis, S3
- Tools:** VS Code, GIT and GitHub, Antigravity, Postman, RabbitMQ, Docker Desktop, JMeter, pgAdmin
- Domain Expertise:** Microservice Architecture & Design, Backend Development, Distributed System & Message Queues, API Development & Security (API key, IP or Header based, JWT), Asynchronous Processing, ETL Pipelines, Web Crawling and DevOps

Education

Bachelor Of Technology in Computer Science

2020-2024

GITA Autonomous College, GPA-8.54

Certifications

- Become a Django Developer - LinkedIn
- 100 days of Code: The Complete Python Pro Bootcamp - Udemy

Achievements & Recognitions

- Solved 200+ coding problems on platforms like LeetCode & HackerRank
- Earned Leetcode 50 days Badge and Top SQL 50 Badge
- Coding Profile: [LeetCode](#) | [HackerRank](#)
